Glossary:	
Arrears	Arrears are calculated in accordance with standard market practice in the UK. A nontgage is identified as being in arrears when, on any due date, the overdue amounts which were due on previous due dates equal, in the aggregate one or more full monthly payments. In making an arrears determination, the servicer calculates as of the date of determination the difference between the sum of all monthly payments that were due and payable by a borrower on any due date, the overdue amounts which were due on previous due dates equal, in the aggregate amount of all authorised underpayments made by such borrower up to such date of determination. If the same of all monthly payments that were due and payable by a borrower on any due date up to that date of determination (less the aggregate amount of all authorised underpayments made by such borrower up to such date of determination and the sum of all payments actually made by that borrower up to that date of determination (less the aggregate equal in conclusion (less the aggregate cancels the accounts is seened to be in arrears. Arrears classification is determined based on the number of equivalent full current monthly payments that have been missed. A borrower that has missed payments that in the aggregate equal or exceeding 2 monthly payments (but for which the aggregate of missed payments) is less than 3 monthly payments would be classified as being 2 to <3 months in arrears, and so on.
Monthly Constant Pre-Payment Rate (CPR)	Monthy CPR on any portfolic calculation date means the total unscheduled principal receipts received during the period of one month ending on that calculation date divided by the aggregate current balance of the loans comprised in the portfolic as at the immediately preceding calculation date. Unscheduled Principal Repayments comprise payments from TSB for the repurchase of loans from the portfolic, and capital repayments and redemptions other than those received at the expected term end date of the loan. Where there has been portfolic transfers within the month, CPR is calculated on a weighted average basis.
